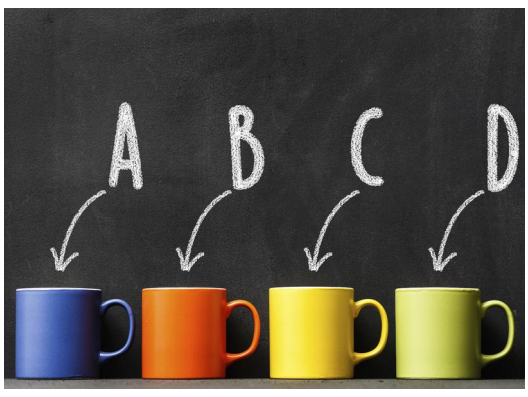
Overview

(Switch to the hand tool so you can click on this hyperlink)



New Font Browser

We've made changing fonts faster and more enjoyable. Now you can see a preview of every font on your system and of the text you are changing.

Learn More

XLIFF Translation

Infix 7 integrates with TransPDF.com - the site where professional translators can use their existing translation software to effortlessly translate PDF.

Learn More

The tools you need, now easier to find and easier to use.

We've fine-tuned many toolbars, menus and dialogues to make Infix even easier to use. The functions you use most often have been made easier to locate and we've moved many to floating palettes so you can avoid hunting for menu items all-together.

Learn More

Bates numbering

Apply consistent numbering across a batch of PDFs or throughout a PDF portfolio. Ideal for legal practices.

Learn More

Text Fitting

A simpler but more powerful text fitting dialogue ensures you don't need a degree in rocket science to produce perfectly fitted text.

Learn More

Spacing Palette

All of the text spacing controls are now available on a quick-access palette to make editing faster.
